Sommaire
Volume 76, 1998

January / janvier

D. Radu and D. Tatomir	Gravitational scattering of massive particles on a background with axial symmetry	1
A. Temkin, Y.D. Wang, A.K. Bhatia, and E.C. Sullivan	The spherically symmetric model of e-H scattering	23
Richard L. Hall and Wei Hua Zhou	Spectral approximation by the polar transformation	31
T.J. Scholl, S.D. Rosner, and R.A. Holt	$B^2\Sigma^+$ state lifetime in CO^+	39
Hasan Saygin	Le développement d'une nouvelle procédure d'autoprotection dans le cadre de la méthode des taux de réaction effectifs	47
A-K. Hamid	Scattering from a spherical shell with a circular aperture using a neural network approach	63
J.L. Boldo, B.M. Pimentel, and J.L. Tomazelli	Infrared dynamics in (2+1) dimensions	69
V.K. Miloslavsky, L.A. Ageev, and A. Nahal	Peculiarities of spontaneous-grating formation in light-sensitive films under elliptically polarized laser radiation	77
Ju Gao, Diola Bagayoko, and Dong-Sheng Guo	The ponderomotive four-momentum	87
Notice to authors / Note aux auteurs		IFC
Instructions to Authors / Recommandations aux auteurs		I-1

February / février

A. van Wijngaarden, F. Holuj, and G.W.F. Drake	Lamb-shift measurement in hydrogen by the anisotropy method	95
S.S. De, A.K. Ghosh, and M. Bera	On some physical characteristics of GaAs-(Ga,Al)As quantum-well photoluminescence	105
Dan Solomon	Gauge invariance and the vacuum state	111
B.L. Burrows, M. Cohen, and Tova Feldmann	Localization effects in a double-well model	129
J.S. Ononiwu	Phonon dispersion curves in the lattice dynamics of body-centered cubic alkali-earth metal barium	143
P. Kurunczi, K. Becker, and K. Martus	Production of vacuum ultraviolet radiation by electron impact on silicon-organic molecules	153
T.V. Galstyan and V. Drnoyan	Combined optical beam-induced hysteresis in a nematic liquid crystal	163
Notice to authors / Note aux auteurs		IFC

March / mars

Savely G. Karshenboim	Some analytic results on the Uehling correction in a muonic atom	169
B.L. Johnson and G. Kirczenow	Systematic study of persistent currents in small systems: geometry and interactions	173
D.L. Sawkey, D. Deptuck, D. Greenwood, and J.P. Harrison	Giant thermomechanical effect in normal liquid 3He	183

F.M. Toyama Behaviour of the nonlinear Dirac soliton in an external field of the Lorentz scalar type	197
S. Lévesque, J.-M. Gagné, and F. Babin Single-color photoionization optogalvanic spectroscopy in U-Xe and U-Ne hollow-cathode discharges	207
Shu-Min Li, Jian-Ge Zhou, Zi-Fang Zhou, Ji Chen, and Yao-Yang Liu Charge transfer in the presence of a radiation field	245

Notice to authors / Note aux auteurs

IFC

April / avril

B. Crasemann Review / Synthèse. Synchrotron radiation in atomic physics	251
Gh.E. Drăgănescu and N.M. Avram Creation and annihilation operators for the Morse oscillator and the coherent states	273
J.W. Darewych and P. Biswas Single quantum pair annihilation of a bound particle-particle-antiparticle system	283
Mark Denny Curling rock dynamics	295
W.A. van Wijngaarden and J. Clarke A quadrupole magnetic trap using a static electric field to study ultracold atoms	305
A. Ayuela, J.M. Lopez, J.A. Alonso, and V. Luaña Ab initio study of $(\text{NaCl})_n\text{Na}^+$ clusters	311
A.I. Smolyakov Gyroviscous forces in a collisionless plasma with temperature gradients	321

Notice to authors / Note aux auteurs

IFC

May/ mai

Gregory S. Adkins and Yu Zhang Infrared behavior of Yennie gauge QED at two-loop order	333
A.K. Ghatak, I.C. Goyal, R. Jindal, and Y.P. Varshni MAF solution for bounded potential problems	351
Kadry Zakaria Kelvin-Helmholtz instability of a horizontal interface between a finite subsonic gas and a finite magnetic liquid	361
B.P. Nigam Callan-Symanzik function in QCD	375
Rani Devi, Arti Pandoh, and S.K. Khosa Microscopic study of backbending in $^{108,110,112}\text{Cd}$ isotopes	381
Mohamed E. Sayed Ahmed and Hazem A. Attia Magnetohydrodynamic flow and heat transfer of a non-Newtonian fluid in an eccentric annulus	391
R. ElAbdi et G. Gambart Sur les opérateurs différentiels symétrisants relatifs aux systèmes non-conservatifs	403

Notice to authors / Note aux auteurs

IFC

June / juin

Carlos F. Bunge, Rocio Jáuregui, and Eugenio Ley-Koo Relativistic self-consistent-field atomic calculations using a generalization of Brillouin's theorem	421
R.D. Kent, M. Schlesinger, and B.G. Wybourne On algebraic approaches to the generic code	445
S. Krasznovszky A phenomenological approach to the multiplicity scaling	453
Jerry B. Altzman and Marvin H. Mittleman Formal theory of multiphoton double ionization: Sequential and direct	459
T.E. Simos High-algebraic, high-phase lag methods for accurate computations for the elastic-scattering phase shift problem	473

Fereshteh Hajiesmaeilbaigi and Ahmad Azima Ultrashort-pulse generation by self-mode-locked Ti:sapphire lasers without apertures and with low pumping powers	495
Akhlesh Lakhtakia Comment on: Point charge moving uniformly in a linear weakly biisotropic medium	501
Pierre Hillion Reply to comment: Point charge moving uniformly in a linear weakly biisotropic medium	502
Notice to authors / Note aux auteurs	IFC

July / juillet

S.G. Karshenboim, V.G. Ivanov, and V.M. Shabaev Some analytic results on the Uehling correction to hyperfine splitting in a muonic atom	503
Oscar Bolina and J. Rodrigo Parreira The ground state of the xy model in a transverse magnetic field	507
F.M. Toyama and Y. Nogami Nonlinear Dirac soliton in an external potential of the pseudoscalar type	515
Jurij W. Darewych Some exact solutions of reduced scalar Yukawa theory	523
Mark Burgess, Margaret Carrington, and Gabor Kunstatter The effective action for a generalized Jaynes-Cummings model	539
Prithipal Singh, M. Saleem Khan, and H. Kushnood Features of relativistic charged particles produced in catastrophic destruction of heavy emulsion nuclei at 4.5 A GeV/c	559
A.Z. Ahmed On the transient development of oblique waves for two layered fluids	567
Notice to authors / Note aux auteurs	IFC

August / août

M.-C. Gagné, J.S. Boulanger, and R.J. Douglas Cesium-fountain development at the National Research Council of Canada	577
Fu-Hu Liu Conditional moments in nuclear fragmentation and liquid-gas phase transition in hot nuclei	601
M.R.M. Witwit and N.A. Gordon Calculations for double-well potentials of perturbed oscillator type in three-dimensional systems using the Hill-determinant approach	609
D.T. Jiang and E.D. Crozier Glancing-angle XAFS of buried ultrathin films	621
Pirooz Mohazzabi Isochronous anharmonic oscillations	645
Notice to authors / Note aux auteurs	IFC

September / septembre

Normand Beaudoin <i>Tutorial / Article didactique</i> : A high-accuracy mathematical and numerical method for Fourier transform, integral, derivatives, and polynomial splines of any order	659
G.W.F. Drake and W.C. Martin Ionization energies and quantum electrodynamic effects in the lower $1sns$ and $1snp$ levels of neutral helium ($^4\text{He I}$)	679
Lixin Wang and W.E. Jones In-situ CARS investigation of vibrational temperature of SF_6 in discharge plasmas	699
Paul Bracken Secular polynomials in energy and coupling for lattice spin models calculated using Hamiltonian matrix elements	707
J.X. Wang, Y.K. Ho, W. Scheid, and H. Hora Interactions of electrons with an intense continuous laser beam: Numerical results	719
J.-M.A. Noël and A.J. Patitsas Modes of vibration in an ideal fluid bounded by two eccentric rigid infinite circular cylindrical boundaries	729

Hazem Ali Attia Hall current effects on the velocity and temperature fields of an unsteady Hartmann flow	739

October / octobre

Yuan Ma, Alexander M. Robinson, Ron P.W. Lawson, Walter Allegretto, and Tiansheng Zhou Static and dynamic characterization of magnetically actuated CMOS-micromachined cantilever-in-cantilever devices	747
M. Musso, F. Fuso, G. De Filippo, M. Allegrini, D. Gruber, and L. Windholz Observation of collisional energy transfer from laser excited Cd atoms to Na(4p $^2P_{1/2}$) atoms	759
Burak Polat Plane wave diffraction by a semi-infinite soft/hard parallel-plate waveguide	771
N.L. Singh, D.J. Shah, and H.B. Patel Investigation of (α, nnp) reactions on ^{56}Fe	785
Anjana Sinha and Rajkumar Roychoudhury Scalar-Coulomb interaction for a deformed nonrelativistic spin-1/2 particle	793
Jianyong Chen, Zhenxiang Chen, Jianwei Shuai, Yingyang Lu, and Donghui Guo A chaotic lattice and the circuit of its unit	801
D.G.C. McKeon Vortex solutions in the Chern-Simons Stueckelberg model	809
W. Shambhunath Singh, S. Dorendrajit Singh, Manabesh Bhattacharya, and P.S. Mazumdar Determination of the orders of kinetics and activation energies of thermoluminescence peaks recorded using a hyperbolic heating profile	815
Dajun Cheng and Yahia M.M. Antar Electromagnetic wave propagation and radiation from an open-end wave guide filled with a gyromagnetic uniaxial chiral medium	823
Notice to authors / Note aux auteurs	IFC

November / novembre

M.D. Whitmore, J.P. Whitehead, and A. Roberge Self-consistent field theory of compressible phospholipid membranes at ambient pressure	831
M.D. Whitmore and J.P. Whitehead Self-consistent field theory of compressible phospholipid membranes at finite pressure	883
E. Träbert, A. Wolf, E.H. Pinnington, J. Linkemann, E.J. Knystautas, A. Curtis, N. Bhattacharya, and H.G. Berry Heavy-ion storage ring measurement of forbidden transition rates between ground-configuration levels in Si^{6+} and Si^{5+} ions	899
V.M. Shabaev Transition probability between the hyperfine structure components of hydrogenlike ions and bound-electron g-factor	907
Notice to authors / Note aux auteurs	IFC
Announcement / Annonce	v

December / décembre

M. Grigorescu Heating-assisted atom transfer in the scanning tunneling microscope	911
M.A. Gorgui, M.S. Faltas, and A.Z. Ahmed Capillary-gravity waves in the presence of infinite cylindrical walls	921
M. Takashima The stability of combined plane Poiseuille and Couette flow in the presence of a transverse magnetic field	937
Nabil T. Eldabe and Sallam N. Sallam Magnetohydrodynamic flow and heat transfer in a viscoelastic incompressible fluid confined between a horizontal stretching sheet and a parallel porous wall	949
Theodore J. Allen and Jeffrey R. Schmidt Vibrational modes of a rotating string	965

M.A. Mansour and Rama Subba Reddy Gorla	Joule-heating effects on unsteady natural convection from a heated vertical plate in a micropolar fluid	977
W. Kedzierski, M. Brennan, and J.W. McConkey	Fragmentation of CO ₂ clusters following electron impact	985
A. van Wijngaarden, F. Holuj, and G.W.F. Drake	<i>Erratum:</i> Lamb-shift measurement in hydrogen by the anisotropy method	993
